

Carra has provided a wide range of Intelligent Traffic Management Systems and services to our customers for over 16 years. We currently hold major ITMS contracts with clients such as the M50 eFlow, Dublin Port Tunnel, An Garda Síochána and Local Authorities nationwide.

Our engineers are experienced in the design, installation and maintenance of systems throughout the sector, from tolling to motorist information to security and alerting systems. With our diverse business partners we're able to cost effectively supply the most up-to-date ITS equipment and give expert advice on its use and integration into your existing systems, and monitor and maintain them.

Carra can provide ITMS solutions of any scale tailored to your specifications. Contact us to review all of your requirements and let us come up with innovative solutions from our wide range of products, services and partners.

M50 barrier-free tolling systems maintenance

Toll installations & maintenance

Access Monitoring Systems
